The Better in the municipal sector

The Better 175 for municipal services

IMPROVING MUNICIPAL SERVICES BY PROMOTING INNOVATION, SUSTAINABILITY, AND ACCESSIBILITY — FOR A MORE EFFICIENT AND INCLUSIVE COMMUNITY

Thanks to its versatile features, the Better 175 is an exceptional equipment carrier, well-suited for a wide range of municipal service applications. It can be quickly adapted with various attachments to meet seasonal and operational needs throughout the year.

- **Winter Season**
with numerous setup possibilities, the Better 175 can efficiently handle all tasks related to winter traffic management, such as snow removal, de-icing, and road maintenance.
- **Spring and Summer Seasons**
during warmer months, the Better 175 supports a variety of operations, including street cleaning, landscaping, green space maintenance, and more.

WINTER SEASON

WHAT CAN THE BETTER 175 DO?

1. SNOW PLOUGH AND SALT SPREADER

Thanks to 4-wheel steering and hydrostatic transmission, the Better is particularly agile when clearing roads—especially in urban areas where parked cars and other obstacles are present. The machine offers excellent visibility both at the front and rear, enabling the operator to work safely and with minimal stress.

2. TURBO FRONT-END SNOW BLOWER

In extreme conditions, when snow accumulation is too heavy for a standard blade and spreader, these can be quickly removed.

By rotating the driver's seat 180°, the turbo front-end snow blower can be attached via the mechanical PTO to the standard rear lift. The system supports both right and left 540/1000 rpm PTOs as standard.

All functions are managed via the forward-positioned joystick, allowing precise and responsive control during operation. A further essential winter task for municipal operators is snow loading in built-up areas. The hydrostatic transmission allows fine adjustment of feed speed, while engine RPM controls snow discharge through the blower's chimney - ensuring smooth, efficient performance even in demanding scenarios.

SPRING AND SUMMER SEASON

WHAT ARE THE USES OF THE BETTER?

1. Street cleaning with sweeper

2. Roadside grass cutting

3. Hedge trimming

4. Maintenance of green areas

5. Material Handling

Thanks to its highly durable yet lightweight steel frame, the Better can perform all these operations while ensuring minimal soil compaction — a crucial advantage for activities on grassy terrain.
